PUBLIC HEALTH REPORTS.

CORRECTION.

In the supplement to Public Health Reports No. 38, September 18, 1903, entitled "Precis on the Management of Outbreaks of Smallpox, Diphtheria, and Scarlet Fever," the last line on page 10 and the first line on page 11, instead of reading "For the production of formaldehyde gas from wood alcohol 24 ounces of wood alcohol should be oxidized for each 100 cubic feet of air space," should read 1,000 cubic feet of air space.

[Reports to the Surgeon-General, Public Health and Marine-Hospital Service.]

BLUE.

Transactions on account of yellow fever at Laredo and San Antonio.

EL PASO.

EL PASO, TEX., October 31, 1903.

WYMAN, Washington:

Tabor to-day wired Justice, State does not require fumigation Mexican Central trains here. Justice has communicated information to Mexican authorities, and fumigation probably will be discontinued to-morrow. Weather here cool; good frost last night.

LUMSDEN.

EL PASO, TEX., *November 1, 1903.*WYMAN, *Washington:*

Mexican superior board health has directed Samanigo to continue fumigation Mexican Central trains. Tabor wires Texas does not require it. Fumigation lasts few minutes only, therefore it does not interfere with our inspection of passengers.

LUMSDEN.

LAREDO.

LAREDO, TEX., *October 29, 1903.*WYMAN, *Washington:*

New cases 6, old cases discovered 1, total reported to-day 7, deaths 1, 27 houses disinfected, with 131 rooms; 256 containers and 13 excavations oiled; 69 premises inspected; 27 faucets put in water barrels; 32 barrels crude oil sprinkled on vacant lots and intervening streets, covering 55 city blocks; 25,000 square feet standing water oiled. Maximum temperature, 85°; minimum, 59°; weather close and sultry. Ten frontier guards in Zapata County discharged yesterday. New Laredo reported 3 new cases yesterday. No cases or deaths to-day. No report from Minera or Connel.

GUITERAS.

LAREDO, TEX., *October 30, 1903.*WYMAN, *Washington:*

New cases 9, old cases discovered 6, total reported to-day 15, deaths 4; 62 houses disinfected, with 169 rooms; 242 containers, 3 excavations, and 10,000 square feet standing water oiled; 210 premises inspected; 95 sprinkled; 19 faucets put in water barrels; 22 barrels crude oil sprinkled on vacant lots and intervening streets, covering 62 city blocks. Maximum temperature, 86°; minimum, 67°. Superintendent at Minera reported down with yellow fever yesterday—had been in Laredo day before. No cases at Connel. New Laredo reports 2 new cases.

GUITERAS.

LAREDO, TEX., *October 30, 1903.*WYMAN, *Washington:*

About 40 enlisted men are to be discharged from Fort McIntosh from November 15 to December 1 in batches of two or three at a time. Detention camp at Sanchez will be practically suspended Monday, November 2. Would like to arrange with the Secretary of War to discharge all on November 15. Special cars could be arranged here with medical inspector and quarantine guards to take them to Texas boundary after five days' quarantine detention within Fort McIntosh Reservation; otherwise these men will remain about town, exposed to infection.

GUITERAS.

LAREDO, TEX., *October 31, 1903.*WYMAN, *Washington:*

New cases 3, old cases 4, total reported to-day 7, deaths 1; 52 houses disinfected with 147 rooms, 437 containers oiled, 274 premises inspected, 65 sprinkled, 29 faucets put in water barrels, 28 barrels crude oil

sprinkled on vacant lots and intervening streets covering 58 city blocks. Maximum temperature 79°, minimum 66°. At my suggestion city council passed ordinance to-day requiring all barrels and water containers to be covered with oil under penalty for violation, and giving Service officers right to enter premises and houses for oiling and disinfection purposes. City officials are giving us efficient aid. Connel reports a case to-day; no report from Minera or New Laredo.

GUITERAS.

LAREDO, TEX., *November 1, 1903.*

WYMAN, *Washington:*

New cases 5, old cases discovered 6, total reported to-day 11, deaths 2; 52 houses disinfected with 116 rooms, 549 containers and 5 excavations oiled, 132 premises sprinkled, 326 inspected, 27 faucets put in water barrels, 14 barrels crude oil sprinkled on vacant lots and intervening streets covering 60 city blocks. Maximum temperature 82°, minimum 47°. Hundreds of laborers are returning to town from cotton fields; these afford new material for the disease. State attorney-general has rendered an opinion that there is no law to prevent their coming. Nine frontier guards discharged yesterday. No new cases reported at New Laredo; no reports from Minera or Connel.

GUITERAS.

LAREDO, TEX., *November 1, 1903.*

WYMAN, *Washington:*

Busily engaged in diagnosing and treating cases. Earnestly tried to save several critical cases with success in some; have been too busy to telegraph.

MURRAY.

LAREDO, TEX., *November 2, 1903.*

WYMAN, *Washington:*

New cases, 5; old cases, 4; total reported to-day, 9; deaths, 9; 56 houses disinfected, with 156 rooms. Report from one crew lacking. Three hundred and twenty-one containers and 6 excavations oiled, 188 premises inspected, 48 sprinkled, 16 faucets put in water barrels, 34 barrels of crude oil sprinkled on vacant lots and intervening streets, covering 51 city blocks. Maximum temperature, 81°; minimum, 47°. No cases or deaths reported from New Laredo. Murray went to Connel to investigate 2 suspicious cases. State detention camp at Sanchez and on Texas-Mexican road practically closed to-day.

GUITERAS.

LAREDO, TEX., *November 3, 1903*

WYMAN, *Washington:*

New cases 6 and old cases 12; total reported 18. No deaths. Of the old cases reported some are so old that a positive diagnosis is impossible. Sixty-six houses disinfected, with 169 rooms. Yesterday's missing report was 10 houses, with 29 rooms; 283 containers and 4 excavations oiled, 227 premises inspected and 67 sprinkled, 25 faucets put in barrels, 45 barrels crude oil sprinkled on vacant lots

and intervening streets, covering 80 city blocks. Maximum temperature, 78°; minimum, 57°. One case reported at Connel; no report from New Laredo.

GUITERAS.

LAREDO, TEX., *November 3, 1903.*

WYMAN, *Washington:*

Visited Connel mine at Darwin, 2d; 1 new, 1 convalescent; no focus. Management claims illicit contact with Columbia, Mexico. No cases at Minera. Darwin houses will be fumigated daily for a week.

MURRAY.

SAN ANTONIO.

SAN ANTONIO, TEX., *October 29, 1903.*

WYMAN, *Washington:*

One case in sixth day of disease and 2 deaths reported to-day. Temperature last twenty-four hours, 56° and 70°.

RICHARDSON.

SAN ANTONIO, TEX., *October 30, 1903.*

WYMAN, *Washington:*

No case and no death reported to-day; temperature last twenty-four hours, 56° and 72°. House-to-house canvass begun by local board to-day. Will take five days to complete. Cold wave predicted.

RICHARDSON.

SAN ANTONIO, TEX., *October 31, 1903.*

WYMAN, *Washington:*

One case in fifth day of disease; no death reported to-day. Temperature last twenty-four hours, 64° and 80°.

RICHARDSON.

SAN ANTONIO, TEX., *November 1, 1903.*

WYMAN, *Washington:*

No case; 1 death reported to-day. Temperature last twenty-four hours, 76° and 47°. One death, Dewitt County; case reported my telegram October 26.

RICHARDSON.

SAN ANTONIO, TEX., *November 2, 1903.*

WYMAN, *Washington:*

Two cases; no deaths to-day. Temperatures last twenty-four hours, 50° and 76°. State quarantine modified to allow travel to north and west Texas.

RICHARDSON.

SAN ANTONIO, TEX., *November 3, 1903.*

WYMAN, *Washington:*

No case and no deaths reported to-day. Temperatures last twenty-four hours, 50° and 74°.

RICHARDSON.

Cases of yellow fever in Dewitt County.

SAN ANTONIO, TEX., October 27, 1903.

SIR: I have the honor to inform you that, as stated in my telegram of yesterday, the yellow fever seen by Doctor Tabor and myself in Dewitt County, near Cuero, can be quite certainly traced to Laredo.

The house in which these cases have all occurred is located on a ranch about 11 miles north of Cuero and the railroad, nearly 2 miles from any other habitation, and about the same distance from the public road.

On September 21 a Mr. A., who had been employed in Laredo, left that place for Cuero, going directly to the house in question and arriving there about September 25. It will be recalled that the former date is only a day or so in advance of the official declaration of the fever at Laredo.

On September 25 Mr. A. was taken sick. He was not seen by any physician, but was prescribed for over the telephone, his case being diagnosticated, from the symptoms given, as dengue fever. He made an uneventful recovery and left the ranch soon after.

On October 13, or eighteen days after Mr. A's. being taken sick, Mrs. B. became ill. She was seen and treated by a physician, her case being at first considered a severe one of dengue.

On October 16 Mr. B. was taken with the same disease. His case from the first excited the suspicion of the attending physician, and during the course of the disease not a symptom of yellow fever was wanting. He died with black vomit and suppression of urine on the morning of October 26.

During the night of October 25 Mrs. C. was taken sick with the same symptoms that had characterized the other three cases.

Doctor Tabor and myself arrived on the ranch the afternoon of the 26th. Mrs. B. was considered by us both and by the attending physician, Doctor Reuss, as convalescing from yellow fever, and Mrs. C. the first day of the disease.

Several stegomyia were seen in the house, one in particular being caught in Mrs. B.'s sick room.

A necropsy was held on the body of Mr. B. about eight hours after death. The appearance of the cadaver and the necropsic findings were absolutely typical and conclusive.

These cases, I think, isolated as they were on this ranch, present a very conclusive example of the period of extrinsic incubation of the disease, and for that reason I have reported them in detail.

Respectfully,

T. F. RICHARDSON,
Assistant Surgeon.

The SURGEON-GENERAL.

Inspection at Houston and Beaumont, October 24-27, 1903, by Dr. C. L. Horton, medical inspector.

NEW ORLEANS, October 27, 1903.

DEAR DOCTOR: As requested by you, I left on the 9 o'clock train Saturday night, October 24, for Houston, Tex., thence to Beaumont to ascertain if the health authorities there were requiring passengers from western Texas to swear that they have not been within the last five days in any place infected with yellow fever.

I arrived at Houston about 10 o'clock Sunday morning. I at once proceeded to the office of the city health officer, Doctor Brumby.

Doctor Brumby told me that Houston had a rigid quarantine against all infected points and that he and the county health officer, Dr. J. E. Hamilton, were working together to keep yellow fever out of Houston and Harris County, and that they had guards stationed at the different points on the county line where the railroads entered from the north, south, and west.

We arranged a conference with Doctor Hamilton for 3 o'clock Sunday afternoon. At the conference were Doctor Brumby, Doctor Hamilton, Dr. O. L. Norsworthy, a member of the Houston board of health, and myself. I told the gentlemen the object of my visit and asked them to show me their method of quarantine against infected points.

They told me they had a detention camp just out of the city limits at a place called Blodgett, where they placed some passengers from San Antonio on the 21st of October, the first day they heard yellow fever was in San Antonio and before they had time to place guards at the county-line stations.

I had already visited Blodgett with Doctor Norsworthy and saw the detention camp was properly isolated and guarded.

Doctor Hamilton then explained to me that as soon as possible after quarantine was declared against San Antonio he placed quarantine guards at the following stations on the county line, who inspected all trains from the west and required each passenger to swear that he or she had not been within the past seven days in San Antonio or any point supposed to be infected with yellow fever, and the passenger was to sign under oath the form of certificate herewith attached.

The following are the county-line stations where guards are stationed and the names of the railroads passing those stations: Missouri City, on the Southern Pacific; Clodine, on the Aransas Pass; Katy, on the Missouri, Kansas and Texas; Hockley, on Houston and Texas Central and Austin branch; Spring, on the International and Great Northern; Humble, on Houston, East and West Texas.

At each of these places on the county line there is a detention camp, and all passengers who refuse to swear they have not been in an infected place or refuse to sign the certificate are placed in the detention camp and detained for six days.

No train is allowed to enter Houston unless it has an O. K. order from the quarantine guards at the county line. As an additional precaution Doctor Hamilton has six quarantine guards at Rosenberg, in Fort Bend (the adjoining) County, where the Southern Pacific, Santa Fe and New York, and Texas and Mexican railroads cross.

These guards meet all trains from the west and go through them and swear each passenger separately, and then give the conductor an O. K. order on to the county line, where the train is again stopped and reinspected, unless the conductor has a certificate of inspection from the guards at Rosenberg.

I told Doctor Hamilton I would like to go to some of the county-line stations and see his guards inspect a train, and he told me to select any place I wished to visit. I chose Missouri City and Rosenberg, they being the most important points, being on the railroads direct from San Antonio. The Southern Pacific Railroad furnished us with a private car and Doctor Hamilton, Doctor Norsworthy, and myself left at 5 o'clock for Missouri City, thence to Rosenberg.

We arrived at Missouri City shortly before the through Southern Pacific train from the west. We waited there for the through train and I saw the guard flag the train and make the conductor show his

certificate of inspection at Rosenberg before permitting the train to proceed to Houston.

We then went on to Rosenberg, where we remained about two hours, during which time a train on the Santa Fe Railroad came in from the west, and I saw the guard there make an inspection of the train.

Missouri City is about 19 miles from Houston, and Rosenberg about 34 miles.

Freight trains are stopped at the various quarantine stations only to look out for tramps.

I expressed my satisfaction to Doctor Hamilton with his system of quarantine, and after telegraphing you we returned to Houston, where we arrived between 11 and 12 o'clock p. m.

I received your telegram Sunday night telling me to go on to Beaumont. I left Houston for Beaumont at 9.20 o'clock Monday morning and arrived at Beaumont between 1 and 2 o'clock. Just as we reached the city limits of Beaumont the train was stopped, and a quarantine guard and a notary public came through the train, and the notary, on reaching the middle of each car, would stop and ask if anyone in the car had been to Laredo, San Antonio, or any other place infected with yellow fever within the last five days. The notary would then ask everyone in the car to hold up their right hands and swear they had not been within the last five days in any place infected with yellow fever.

I met Dr. J. A. Gibson, the health officer at Beaumont, and asked him if he required passengers from the west to swear they had not been in an infected district within the last five days. He told me he did and that he had instructed his guards to swear each passenger separately.

The Beaumont inspection is very poor. No one is questioned individually unless he should happen to be asleep when the notary swears the car; if so, he is aroused and sworn individually. They are simply required to give a verbal oath, and no certificate of any kind is required.

I told Doctor Gibson how the guards swore the train I came on from Houston, and he said he would correct it.

The passengers on the through train from Texas last night were sworn in the same manner as they were during the day.

I think we are amply protected by the quarantine at Houston, as no passenger is allowed to pass through Houston if he has been in an infected place in the last seven days.

I told Doctor Brumby about my hearing that a woman came into Houston from San Antonio last Thursday night over the Houston and Texas Central Railroad, and he explained that fact by saying the quarantine was established so hurriedly that they had to take anybody as a guard, and the guards on the Houston and Texas Central were careless in their work. He discharged the guard for allowing the passenger to get into Houston, and has reliable men at all points now. The woman has been watched and has remained perfectly well.

I left Beaumont for New Orleans last night between 10 and 11 o'clock and arrived this morning about 9 o'clock.

Very respectfully,

C. L. HORTON, M. D.,
Medical Inspector.

DR. EDMOND SOUCHON,
President Louisiana State Board of Health.

Form of affidavit in use at Houston.

Houston city and Harris County quarantine.

Questions:

1. Where did you stop in Houston?
2. Where are you from?
3. What day did you start?
4. Do you solemnly swear that you have not been in San Antonio or any point supposed to be infected with yellow fever within the past seven days?

Sign names:

1. _____. 3. _____.
2. _____. 4. _____.
_____, Texas, _____, 1903.

NEW ORLEANS, *October 27, 1903.*

DEAR DOCTOR: I inclose a copy of Dr. C. L. Horton's report on his trip to Beaumont and Houston. Again thanking you for kind cooperation, I beg to remain,

Yours, very truly,

EDMOND SOUCHON, M. D.,

President Louisiana State Board of Health.

The SURGEON-GENERAL,

Public Health and Marine-Hospital Service.

Statistical reports of States and cities of the United States—Yearly and monthly.

CALIFORNIA.—Month of September, 1903. Reports from 39 cities and towns, representing a population of 899,406, show a mortality of 980, including diphtheria 9, enteric fever 15, measles 1, scarlet fever 1, whooping cough 1, plague 1, and 131 from tuberculosis.

San Diego.—Month of September, 1903. Estimated population, 20,000. Total number of deaths, 22, including 2 from tuberculosis.

ILLINOIS—*Belleville*.—Two weeks ended October 23, 1903. Estimated population, 17,800. Total number of deaths, 17, including enteric fever 1, smallpox 2, and 1 from tuberculosis.

MICHIGAN.—Reports to the State board of health, Lansing, for the week ended October 24, 1903, from 81 observers, indicate inflammation of kidney was more prevalent, and dysentery, intermittent fever, pneumonia, cholera morbus, cholera infantum, inflammation of bowels, and whooping cough were less prevalent. Meningitis was reported present at 3, whooping cough at 11, measles at 14, smallpox at 21, diphtheria at 48, scarlet fever at 67, enteric fever at 94, and phthisis pulmonalis at 209 places.

MINNESOTA—*Duluth*.—Month of July, 1903. Census population, 52,968. Total number of deaths, 64, including diphtheria 2, enteric fever 1, scarlet fever 1, and 10 from tuberculosis. Month of August, 1903. Total number of deaths, 77, including diphtheria 4, enteric fever 1, and 8 from tuberculosis.

Mankato.—Month of July, 1903. Census population, 10,599. Total number of deaths, 13, including 1 from tuberculosis. Month of August, 1903. Total number of deaths, 18, including 3 from tuberculosis.

Minneapolis.—Month of July, 1903. Census population, 202,718. Total number of deaths, 236, including diphtheria 1, enteric fever 5, measles 1, scarlet fever 3, whooping cough 2, and 30 from tuberculosis. Month of August, 1903. Total number of deaths, 217, including diphtheria 3, enteric fever 8, scarlet fever 3, smallpox 1, whooping cough 1, and 19 from tuberculosis.

St. Paul.—Month of July, 1903. Census population, 163,065. Total number of deaths, 141, including enteric fever 2, scarlet fever 3, and 15 from tuberculosis. Month of August, 1903. Total number of deaths, 186, including diphtheria 3, enteric fever 2, scarlet fever 2, smallpox 1, whooping cough 1, and 14 from tuberculosis.

Stillwater.—Month of July, 1903. Census population, 12,318. Total number of deaths, 12, including 3 from tuberculosis. Month of August, 1903. Total number of deaths, 9, including scarlet fever 1, and 1 from tuberculosis.

Winona.—Month of July, 1903. Census population, 19,714. Total number of deaths 22, including 2 from tuberculosis. Month of August, 1903. Total number of deaths, 20, including whooping cough 1, and 1 from tuberculosis.

MISSOURI—*St. Louis*.—Month of September, 1903. Estimated population, 645,000. Total number of deaths, 759, including diphtheria 4, enteric fever 42, measles 1, scarlet fever 4, whooping cough 5, and 88 from tuberculosis.

OHIO—*Cincinnati*.—Month of August, 1903. Estimated population, 336,000. Total number of deaths, 450, including diphtheria 6, enteric fever 7, whooping cough 4, and 79 from tuberculosis.

PENNSYLVANIA—*Pottsville*.—Month of October, 1903. Census population, 15,710. Total number of deaths, 27, including diphtheria 1, and 3 from enteric fever.

VIRGINIA—*Lynchburg*.—Month of October, 1903. Population, 30,000. Total number of deaths, 23, including diphtheria 1, and 7 from tuberculosis.

FOREIGN AND INSULAR.

BRAZIL.

Report from Bahia.

Vice-Consul Rowe reports as follows: For the week ended September 19, 1903, there were interred in the Bahia cemeteries 91 bodies. The causes of death were aneurism 1, aortic dilatation 1, arterio-sclerosis 4, beriberi 3, bronchitis 1, cirrhosis of liver 2, diabetes 1, diarrhea 1, diarrhea and enteritis 7, gangrene 1, hepatitis 1, influenza 2, malarial fevers 2, nephritis 1, organic diseases of heart 2, pneumonia 3, puerperal fever 2, pulmonary tuberculosis 12, senile debility 2, still-born 7, rachitis 1, rheumatism 1, tetanus neonatorum 3, uremia 1, other causes 29.

For the week ended September 26, 1903, there were interred in the Bahia cemeteries 73 bodies. The causes of death were aneurism 2, apoplexy 1, arterio sclerosis 2, asphyxia 1, beriberi 4, Bright's disease 1, bronchitis 2, cerebral congestion 2, diarrhea 3, diarrhea and enteritis 2, gangrene 1, influenza 2, intestinal parasites 1, malarial fever 4, meningitis 1, organic diseases of heart 2, puerperal eclampsia 1, pneumonia 2, pulmonary diseases 9, senile debility 3, stillborn 2, syphilis 1, tetanus neonatorum 1, umbilical hemorrhage 1, other causes 22.

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Carson reports as follows for the week ended October 18, 1903: Number of deaths during the week, 5. Prevailing disease, mild type of malarial fever. General sanitary condition of this port and the surrounding country during the week, good. The 5 deaths noted above which occurred in this port were all colored adults, due to, respectively, senility, cancer of uterus, and 3 to pulmonary phthisis.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Oct. 15	Hispania	21	0	0	0
15	Spheroid	29	0	0	0
16	Breakwater	33	3	23	6

CANADA.

Report of immigration at Quebec.

Assistant Surgeon Billings reports, October 26, as follows: Week ended October 24, 1903; number inspected, 219; number passed, 211; number detained, 8.

COLOMBIA.

Report from Bocas del Toro, fruit port.

Acting Assistant Surgeon Osterhout reports as follows for week ended October 20, 1903: Population not obtainable; number of deaths during the week, 4. Prevailing disease, malarial fever. The 4 deaths noted were due, respectively, to malarial fever 2, tertiary syphilis 1, bronchitis 1. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Oct. 14	Barnstable.....	32	2	0	3
14	Fort Morgan.....	22	0	0	0
16	Colombia.....	20	0	0	0
18	Brighton.....	23	0	0	0

COSTA RICA.

Report from Limon, fruit port.

Acting Assistant Surgeon Gruver reports as follows for week ended October 22, 1903: Present officially estimated population, 4,000. Number of cases of yellow fever during the week, 1; deaths, none; number of deaths from other causes during the week, 5. Prevailing diseases, malarial. General sanitary condition of this port and the surrounding country during the week, not good. The Government has begun a crusade against mosquitoes by ordering all water tanks and barrels to be destroyed.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Oct. 17	Taunton.....	25	0	0	0
19	Alene.....	43	4	0	0

22	Beverly.....	39	0	0	0
22	Amstel.....	24	0	0	0

CUBA.

Report from Cienfuegos.

Acting Assistant Surgeon McMahon reports as follows:

During the week ended October 17, 1903, bills of health were issued to three vessels going to ports in the United States. All in good sanitary condition and no sickness on board of any of them. No quarantinable disease has been reported in the city during this week, nor has any appeared on vessels entering this port. The mortuary report will be forwarded as soon as received.

Report from Habana—Mortuary statistics.

Assistant Surgeon Trotter reports the following transactions during the week ended October 17, 1903:

Number of health certificates issued	101
Number of vessels inspected and issued bills of health	16
Number of crews of outgoing vessels inspected	785
Number of passengers of outgoing vessels inspected	837
Number of pieces of baggage inspected	114
Number of pieces of freight inspected	3,033
Number of pieces of express inspected	16

I inclose herewith the usual weekly mortuary report of the city of Habana.

Mortuary report of Habana for the week ended October 17, 1903.

Disease.	Number of deaths.
Tuberculosis.....	19
Pneumonia.....	3
Bronchitis.....	4
Broncho-pneumonia.....	2
Typhoid.....	2
Enteritis.....	1
Scarlet fever.....	7
Meningitis.....	4
Septicæmia.....	2
Cancer.....	7

Total deaths from all causes, 120.

Week ended October 24, 1903:

Number of health certificates issued	116
Vessels inspected and issued bills of health	19
Crew of outgoing vessels inspected	755
Passengers of outgoing vessels inspected	252
Pieces of baggage inspected	145
Pieces of express (meat boxes) disinfected	3
Pieces of freight inspected	976
Pieces of express inspected	18

The August report of the superior board of health of the island is inclosed, and the attention of the Bureau is invited to the letter of Dr. Carlos J. Finlay to the secretary of government, on page 4. Doctor Finlay, in his letter, calls attention to the alarming and distorted reports printed in the American papers of an epidemic at Daiquiri in early September, and to General Wyman the board extends its thanks for using his influence in denying and dispelling these rumors. Scarlet fever has shown an increase this month, there being 15 deaths from that disease from October 1 to 24. For the week just ended there were 6 deaths from the disease, a decrease of 1 over the report of the previous week. Doctor Barnet, the executive officer of the board, has issued a pamphlet, copy inclosed, for general distribution among the public, upon the "Method of contagion and propagation of scarlet fever," which contains instructions for isolating the sick, method of preparing disinfectants, etc.

I inclose herewith the usual weekly mortuary report.

Mortuary report of Habana for the week ended October 24, 1903.

Disease.	Number of deaths.
Tuberculosis.....	17
Pneumonia.....	1
Bronchitis.....	1
Typhoid.....	3
Enteritis.....	1
Meningitis.....	3
Scarlet fever.....	6
Leprosy.....	1
Cancer.....	5

Total deaths from all causes, 89.

Report from Matanzas.

Acting Assistant Surgeon Nunez reports as follows for week ended October 24, 1903:

Two bills of health were issued to vessels bound for United States ports.

A decided change in the weather has been noticed recently. The prevailing temperature, which had been ranging between 85° and 90° F., suddenly has fallen to 70° since early morning of the 24th instant, remaining more or less stationary ever since.

At my present writing, 9 a. m., the thermometer marks 74°, with a tendency to rise.

One more case of diphtheria was reported in the beginning of the past week, same terminating in recovery.

No quarantinable disease has been reported.

Mortuary statistics covering the last ten days of present month, not being yet available, will be forwarded with my report next week.

Report from Santiago—Mortuary statistics.

Acting Assistant Surgeon Wilson reports as follows for the week ended October 17, 1903:

Bills of health were issued to 4 vessels bound for the United States and Porto Rico.

No quarantinable disease has been reported.

Dr. Reyes Zamora is no longer medical director of the sanitary department (municipal), and Dr. Isidoro Agostini has been named in his place.

I inclose the weekly abstract of bills of health issued and the mortuary statistics for the week; also mortuary report for the third quarter of 1903.

Mortuary statistics for the week ended October 17, 1903.

GERMANY.

Reports from Berlin—Plague and cholera in various countries.

Consul-General Mason reports, October 19 and 22, as follows:

Plague.

Turkey.—The results of an investigation show that the person attacked with plague in Smyrna was an employee of a business house. The patient died on September 25.

Egypt.—From September 26 to October 3, inclusive, there were registered in the whole of Egypt 5 cases of plague (and 2 deaths), namely, 4 cases (1 death) in Alexandria, and 1 case (1 death) in Damiette.

British India.—During the week ended September 19 there were registered in the Bombay Presidency 12,877 cases of plague (with 9,236 deaths), of which 78 cases (73 deaths) occurred in the city of Bombay, and 29 cases (27 deaths) in Broach.

Hongkong.—During the period from the 16th to the 29th of August there were registered in Hongkong 7 cases of plague (with 6 deaths).

South Africa.—During the week from the 6th to the 12th of September there were registered 1 case of plague in Port Elizabeth and 1 case in East London.

Plague and cholera.

British India.—In Calcutta, during the week ended September 5, 18 persons died of plague and 8 persons died of cholera.

Cholera.

Turkey.—According to Bulletin No. 28, of September 28, there have been registered in Syria since the date of the last bulletin 351 cases of cholera (with 303 deaths), of which there occurred—In Damascus, 138 cases (112 deaths); Aleppo, 53 cases (50 deaths); Hazaz, 36 cases (17 deaths); Urfa, 33 cases (25 deaths); Zebdani, 24 cases (27 deaths).

Plague.

Egypt.—During the period from the 3d to the 10th of October, inclusive, there were registered in Alexandria 7 cases of plague (and 2 deaths).

Philippines.—During the month of August there were registered 12 cases of plague (and 8 deaths).

Mauritius.—During the period from the 7th of August to the 3d of September 78 cases of plague occurred on the island (with 60 deaths).

British South Africa.—During the week ended September 19, 1 plague patient died in the hospital at Port Elizabeth. Plague rats continue to be found in the docks at East London.

Brazil.—During the two weeks from the 7th to the 20th of September there were registered in Rio de Janeiro 27 fresh cases of plague (and 23 deaths). The number of plague patients treated in the hospital in the first week amounted to 53, in the second week to 56.

Chile.—During the month of August there occurred in Iquique 61 cases of plague (with 30 deaths). In Valparaiso there were registered in the period from August 13 to the 2d of September 3 cases of plague (and 1 death).

Plague and cholera.

British India.—In Calcutta during the week ended September 12, 13 persons died of plague and 4 persons died of cholera.

Cholera.

Turkey.—According to Bulletin No. 29, of October 5, a further 392 cases of cholera have occurred in Syria (with 332 deaths).

Death rate of Berlin.

The death rate of Berlin for the week ended October 10 was somewhat higher than in the two preceding weeks, amounting, calculated on the year, to 14.4 per thousand of the inhabitants, thus being, however, considerably lower than the rate for the corresponding week of last year, in which it amounted to 15.7 per thousand.

The population of Berlin proper on the 1st of January, 1903, was 1,926,632. This does not, however, include the population of the large suburban cities of Charlottenburg, Schöneberg, Wilmersdorf, etc., which are in reality part of the city, inasmuch as the whole space is solidly built, so that it is impossible to notice from the character of the buildings when one passes from Berlin into either of these suburbs. Including the population of these suburban districts, which belong properly to the city, the population of Berlin is about 2,468,000.

Of the large German towns only 7 showed somewhat more favorable figures than Berlin, viz, Frankfurt-am-Main, Cassel, Hanover, Elberfeld, Bremen, Schöneberg, with 9.7, and Charlottenburg, with 9 per thousand. The following cities, among others, had a considerably higher death rate than Berlin, namely, Hamburg, Dresden, Stuttgart, Karlsruhe, Brunswick, Munich, Nuremberg, Strassburg, Cologne, Leipzig, Breslau, as well as London, Paris, and Vienna. Since the foregoing week the increase in the number of deaths was almost exclusively confined to the children in the first year of life, hardly any difference being noticeable in the higher-age classes. The death rate among infants rose to 4.7 per year and mille, which rate, however, was only half that of Munich and Nuremberg. Among the causes of death acute intestinal diseases predominated, claiming 79 victims; 24 infants succumbed to cholera; acute diseases of the respiratory organs caused 38 deaths; phthisis pulmonalis claimed 65 victims, and 28 persons died of cancer. There were also registered 7 deaths from scarlet fever, 5 deaths from measles, 4 deaths from diphtheria, and 4 deaths from typhus. Four persons died by violence.

Mortality and its causes in German cities for the last twenty-five years.

Consul-General Guenther reports, October 13, 1903, from Frankfort on the Main as follows:

The latest volume of the statistics of the German Empire contains a report with reference to the causes of mortality in German cities of more than 15,000 inhabitants for the period from 1877 to 1901.

These cities had a population of 7.3 millions in 1877 and 17.5 millions in 1891.

The total mortality per year during the five years from 1877 to 1881 for every 100,000 inhabitants was 2,673 against 2,046 in the five years from 1897 to 1901.

This great decrease of mortality is a result of progress in many respects. Medicine, legislation and government, sewerage, waterworks, sprinkling of streets, removal of garbage, more light and air through wider streets and parks, public bathing establishments, and playgrounds for children have improved the sanitary conditions in general, while the progress in medicine and chemistry, the antiseptic and aseptic treatment of wounds, the prevention of the spread of infectious and contagious diseases through disinfection, the serum of Behring, and the larger number of physicians and nurses in hospitals and sanatoriums have increased the chances of recovery and given better protection against infection.

The more stringent laws for the protection and health of working people and the inspection of nutriment have also contributed to the general result.

The steady decrease in the number of suicides is also noteworthy.

From 1877 to 1881 the number of suicides was 31 for 100,000 inhabitants; from 1897 to 1901, only 24.5.

It is to be surmised that the decrease in suicides is in consequence of better conditions for making a living, increased wealth, and better nutrition.

The statistics, however, of death from acute intestinal diseases, inclusive of cholera infantum, are very unsatisfactory. Of such diseases the mortality in the said cities of the German Empire in every 100,000 inhabitants was—

During the years—	Persons.
1877 to 1881.....	264.1
1882 to 1886.....	253.1
1887 to 1891.....	258.2
1892 to 1896.....	256.6
1897 to 1901.....	287.8

In the mortality from this group of diseases, therefore, no improvement is recorded, but, on the contrary, more persons died from this cause during the last five years than in any similar period since 1877. Considering the fact that especially many infants die of some of these diseases, it might be possible that this high rate of mortality was on account of a much larger birth rate during the years from 1897 to 1901.

But just the contrary is the case; the number of live births per 100,000 inhabitants has decreased.

The reason for this greater mortality and smaller birth rate is to be found in the increased employment of women. The more women enter into remunerative employment the more are infants deprived of their best nutriment, mother's milk.

For this reason more attention must be paid to the purity and quality of animal milk.

GUATEMALA.

Report from Livingston, fruit port.

Acting Assistant Surgeon Peters reports as follows for the week ended October 19, 1903: Present officially estimated population, about 3,500. Number of deaths during the week, 3. Prevailing diseases, malarial. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Oct. 13	Hispania.....	21
13	Brenkwaters.....	33	1	3
14	Arkadia.....	31
19	Alliance.....	15

a Brenkwaters and Arkadia cleared from Puerto Barrios.

HONDURAS.

Report from Ceiba—Fruit port.

Acting Assistant Surgeon Robertson reports as follows for the week ended October 17, 1903: Present officially estimated population, about 4,000; number of deaths during the week, 1; prevailing disease, mala-

rial; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Oct. 11	Rosina.....	29	3	0	0
15	H. Dumois.....	24	0	0	0
15	Origen.....	24	0	0	0
17	Managua.....	16	1	0	0

Week ended October 24, 1903: Present officially estimated population, about 4,000; number of deaths during the week, 1; prevailing disease, malarial; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Oct. 21	Snyg.....	13	0	0	0
21	America.....	19	0	0	0
22	Beatrice.....	22	0	0	0
24	Belita.....	22	0	0	0

Report from Puerto Cortez, fruit port.

Acting Assistant Surgeon Carter reports as follows for the week ended October 20, 1903: Present officially estimated population, 2,125. Prevailing diseases, malarial fever of mild form and intestinal diseases. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage inspected and sealed.
Oct. 15	Breakwater.....	33	25	2	47
16	Bratten.....	16	5	0	9
16	Alliance.....	15	0	0	0

Owing to the fact that New Orleans instructed their representative that baggage need not be disinfected for New Orleans, baggage for steamship *Breakwater* was inspected and sealed, according to Revised Regulations, 1903.

JAPAN.

Report from Yokohama—S. S. Tairen Maru quarantined at Kobe.

Assistant Surgeon Moore reports, October 1, as follows:

Week ended September 26, 1903, 6 steamers, having an aggregate personnel of 689 crew and 1,008 passengers, were inspected; 299 steerage passengers and 1 crew were bathed, and 445 pieces of baggage were disinfected. With reference to 68 aliens, would-be steerage passengers to the United States, the interested steamship companies were notified that they were suffering from trachoma.

During the week ended September 19, 1903, since which date no official returns have been received, infectious diseases were reported in Yokohama as follows: Enteric fever, 7 cases, 1 death; scarlet fever, 1 case, no deaths; diphtheria, 1 case, no deaths; plague, 2 cases, no deaths; dysentery, 10 cases, 1 death. No new cases of plague have since been reported to me.

An official statement of infectious diseases in Yokohama from the beginning of the year to September 19 has been received as follows: Cholera, no cases, no deaths; yellow fever, no cases, no deaths; small-pox, 2 cases, no deaths; typhus fever, no cases, no deaths; enteric fever, 113 cases, 29 deaths; scarlet fever, 2 cases, no deaths; diphtheria, 94 cases, 27 deaths; plague, 24 cases, 19 deaths; plague (doubtful), 3 cases, no deaths; dysentery, 135 cases, 17 deaths; dysentery (doubtful), 12 cases, 2 deaths.

The steamship *Tairen Maru* was quarantined at Kobe on the 27th of September owing to the fact that a passenger, an American woman, had developed symptoms of cholera after landing at Shemonoseki. The *Tairen Maru* hails from Chefoo via Dalny and Korean ports.

Cholera in Nagasaki.

The vice-consul at Nagasaki reports, October 26, 1903, to the Department of State, the presence of cholera in Nagasaki.

MEXICO.

Report from Progreso.

Acting Assistant Surgeon Harrison reports as follows for the week ended October 17, 1903: Present officially estimated population, 8,000. Number of deaths during the week, 3. Prevailing diseases, if any, are malarial and enteric. There were 2 cases of yellow fever reported about the 5th of current month, but both have been discharged. There is nothing of special interest, the conditions being unchanged here and in Merida. In the latter city the yellow fever is abating. The healthfulness of Progreso and immediate vicinity is satisfactory.

Bills of health were issued to the following vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Oct. 11	Esperanza	New York	94	27	46
14	Parthia	New Orleans	31
16	Tjomo	New York	18

Report from Tampico.

Temporary Acting Assistant Surgeon Lippincott reports, October 20, as follows for the week ended October 17, 1903:

Bills of health issued	6
Vessels inspected and passed	4
Vessels disinfected and passed	2
Personnel of crew	147
Passengers	2
Baggage	2 pieces

During the week there were 8 new cases of yellow fever officially reported and remaining from the previous week 9, making a total of 17 cases for the week ended October 17, 1903.

There were 18 deaths registered from all causes, of which 3 were from yellow fever, 2 from pernicious fever, 2 from tuberculosis, and 11 from noncontagious causes.

There has been some improvement both in number of cases and deaths. This is probably due to a norther, which reduced the temperature sufficiently to kill many of the mosquitoes; also many of the cess-pools have dried up, thereby destroying the larvæ.

I find the stegomyiæ decreasing in number and the anopheles increasing.

The type of yellow fever now existing seems to be of a mild form. This will be noticed by death rate as in comparison with July and August.

The surrounding country still remains badly infected.

Report from Vera Cruz—Yellow fever, malarial fever, and tuberculosis.

Assistant Surgeon Goldberger reports as follows: During the week ended October 17, 1903, there were officially recorded, in all, 66 deaths, of which 18 were due to yellow fever, 4 to malarial fevers, and 13 to tuberculosis.

There were officially reported during the week 52 new cases of yellow fever, but inasmuch as these diagnoses are made almost invariably without a blood examination, without which an accurate diagnosis can not be made, certainly not in this region, where the æstivo-autumnal fever is prevalent and forms of which simulate yellow fever very closely, these figures should be considerably reduced.

There has been a considerable increase in the reported mortality from tuberculosis thus far this month, probably due in considerable measure to several "northers," which reduced the average temperature 6° to 8° C. This drop in the temperature may also explain, in connection with the sanitary measures now enforced, the reduction in the number of cases of yellow fever and the increase in malaria.

NICARAGUA.

Report from Bluefields, fruit port.

Date of arrival.	Vessel.	Where from.	Number of immigrants.
	St. Domingue	Port au Prince, Jeremie, Les Cayes, Jacmel, St. Domingue.	4

TURKEY.

Cholera in the vilayet of Harput.

Consul Norton reports, October 6, as follows:

The cholera has reached this vilayet. Four cases are reported from the little town of Gerger, about 80 miles southwest of Mamouret-ul-Aziz. Yesterday there were 2 fatal cases of cholera at Arghani-Maaden on the main road from here to Diarbekir, 45 miles from Mamouret-ul-Aziz. Quarantine was at once established against Arghani-Maaden by the authorities of our vilayet. All travelers from that quarter are subjected to a detention of ten days at Kizin Khan, 30 miles from here. During the epidemics of recent times the disease never reached Harput and Mamouret-ul-Aziz, although a few cases occurred in nearby villages. Gerger is surrounded by a cordon.

VENEZUELA.

Maracaibo quarantines against plague.

Consul Plumacher, at Maracaibo, sends, October 8, to the Department of State as follows:

[Translation.]

Quarantine.

UNITED STATES OF VENEZUELA,

MINISTRY OF THE INTERIOR,

Caracas, September 23, 1903.

Decided.—In accordance with article 2 of the sanitary regulations of ports in regard to the bubonic plague, the President of the Republic decides, first, that the vessels coming from ports infected or suspected of infection of said plague shall be submitted to a quarantine of twelve days, counted from the day they left the port, as to the passengers, and to the same quarantine and disinfection in regard to the merchandise; second, the vessels that have had on board during the voyage any case of bubonic plague will be submitted to a quarantine of twelve days, counted from the day of their arrival in port, in this case with the passengers and merchandise.

Communicate and publish it.

For the Federal Executive:

LUCIO BALDO.

MARACAIBO, *October 8, 1903.*

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

ARGENTINA—*Buenos Aires.*—Month of August, 1903. Population, 882,046. Total number of deaths, 1,254, including diphtheria 4, enteric fever 4, measles 18, smallpox 12, and 193 from tuberculosis.

AUSTRALIA—*New South Wales—Sydney.*—Month of August, 1903. Population, 383,386. Total number of deaths, 497, including diphtheria 8, enteric fever 5, measles 1, scarlet fever 5, whooping cough 4, and 54 from tuberculosis.

FRANCE—*Rouen.*—Month of September, 1903. Estimated population, 116,316. Total number of deaths, 239, including enteric fever 9, measles 1, scarlet fever 1, smallpox 5, whooping cough 1, and 31 from tuberculosis.

GERMANY—*Baden—Kehl.*—Month of August, 1903. Estimated population, 170,000. Total number of deaths, 61, including diphtheria 2, enteric fever 2, measles 6, whooping cough 5, and 46 from tuberculosis.

Weimar.—Month of September, 1903. Estimated population, 30,842. Total number of deaths, 36. No deaths from contagious diseases.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 76 great towns in England and Wales during the week ended October 17, 1903, correspond to an annual rate of 15.8 per 1,000 of the aggregate population, which is estimated at 15,075,011.

Bradford.—Fortnight ended October 10, 1903. Estimated population, 281,770. Total number of deaths, 157, including enteric fever 3, scarlet fever 1, whooping cough 1, and 14 from phthisis pulmonalis.

London.—One thousand three hundred and fifty-one deaths were registered during the week, including measles 14, scarlet fever 8, diphtheria 10, whooping cough 11, enteric fever 12, and diarrhea 125. The deaths from all causes correspond to an annual rate of 15.3 per 1,000. In Greater London 1,815 deaths were registered. In the "outer ring" the deaths included 2 from diphtheria and 1 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended October 17, 1903, in the 21 principal town districts of Ireland was 16.6 per 1,000 of the population, which is estimated at 1,093,289. The lowest rate was recorded in Lisburn, Sligo, and Tralee, viz, 0, and the highest in Newtownards, viz, 40.1 per 1,000. In Dublin and suburbs 145 deaths were registered, including enteric fever 4, whooping cough 1, and 35 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended October 17, 1903, correspond to an annual rate of 16.1 per 1,000 of the population, which is estimated at 1,702,912. The lowest rate of mortality was recorded in Aberdeen, viz, 13.3, and the highest in Perth, viz, 20.1 per 1,000. The aggregate number of deaths registered from all causes was 527, including diphtheria 4, measles 14, scarlet fever 5, smallpox 1, and 7 from whooping cough.

ITALY—Genoa.—Month of July, 1903. Population, 228,202. Total number of deaths, 2,475, including diphtheria 43, enteric fever 29, measles 7, scarlet fever 4, smallpox 2, whooping cough 5, and 441 from tuberculosis.

Milan.—Month of August, 1903. Estimated population, 505,879. Total number of deaths, 767, including diphtheria 16, enteric fever 36, measles 3, and 83 from tuberculosis.

JAPAN—Nagasaki.—Ten days ended September 30, 1903. Population, 148,883. Number of deaths not reported. One death from enteric fever reported.

JAMAICA.—Two weeks ended October 17, 1903. Population, 755,730. Number of deaths not reported. One death from enteric fever reported in the parish of St. James.

JAVA—Batavia.—Two weeks ended September 12, 1903. Estimated population, 150,000. No deaths reported.

TERRITORY OF HAWAII—Honolulu.—Month of September, 1903. Census population, 39,306. Total number of deaths, 69, including bubonic plague 2, enteric fever 3, whooping cough 1, and 12 from tuberculosis.

SPAIN—Barcelona.—Week ended October 10, 1903. Estimated population, 600,000. Total number of deaths, 213, including enteric fever 39, and 5 from smallpox.

SWITZERLAND.—Reports for the two weeks ended October 3, 1903, from 18 cities and towns having an aggregate population of 790,000, show a total of 569 deaths, including diphtheria 2, enteric fever 2, measles 3, scarlet fever 2, and 67 from tuberculosis.

Cholera, yellow fever, plague, and smallpox, June 27, 1903, to November 6, 1903.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from United States consuls through the Department of State and from other sources.]

[For reports received from December 27, 1902, to June 26, 1903, see PUBLIC HEALTH REPORTS for June 26, 1903.]
